

### **Information for Obstetrical Patients**

This information is presented so that you understand our financial policies related to pregnancy and to avoid any unexpected charges being billed to you directly.

- You must present your insurance card at every visit.
- It's your responsibility to notify us immediately if your insurance coverage changes or stops during your pregnancy and you must present a valid ID card for any new coverage.
- If you switch your primary insurance from private to Medicaid during your pregnancy, it will be up to the individual physician to decide whether to continue to see you through your pregnancy.
- If we bill Medicaid as your primary insurance and find that you have other primary coverage you did not tell us about, we will report this as fraud to TMHP.
- If your post-partum care transfers to the Medicaid's Healthy Texas Women Program, we are NOT providers.
