

At **Women Partners** we value your safety and comfort. Before prescribing certain medications, we always check the Texas Prescription Monitoring Program (PMP), a statewide database that tracks prescription data of controlled substances and medications with misuse potential. These medications include opioids, benzodiazepines, barbiturates, stimulants, sedatives, and muscle relaxers.

<b>Prescription Type</b>	<b>Common Drug Example</b>
Benzodiazepines	Alprazolam (e.g., Xanax), clonazepam (e.g., Klonopin), diazepam (e.g., Valium)
Barbiturates	Amobarbital (e.g., Amytal), secobarbital (e.g., Seconal)
Stimulants	Amphetamine (e.g., Adderall), methylphenidate (e.g., Ritalin), phentermine
Sedatives	Zolpidem (e.g., Ambien), Zaleplon (e.g., Sonata), Eszopiclone (e.g., Lunesta)
Muscle Relaxers	Carisoprodal (e.g., Soma)

Your safety, comfort, and wellbeing are our priority. Your safety comes before all else.
